

SET-Nav 2050 workshop: Presentations are available

At the **SET-Nav Regional Workshop**, which was held in **Budapest** on **26 February**, modelling teams presented the main results and policy recommendations for the Pathways Scenarios. The goal of the workshop was to get relevant stakeholder feedback on the modelling results.

Detailed sectoral analyses of the four decarbonisation pathways were presented for the building, industry, transport, power and heat sector, as well as the implications for the electricity and natural gas networks.

Barriers to entry in EU retail energy markets

The consortium of REKK, [VaasaETT](#), [MRC](#) and [The Advisory House](#) contracted by the European Commission conducts a Europe-wide research project to analyse

barriers to entry in retail energy markets. The project assesses the challenges facing suppliers and other retail market competitors in 30 European electricity and gas markets. All 28 Member States plus Switzerland and Norway, will be covered.

The project will draw on carefully crafted and extensive interviews and questionnaires with an extensive array of stakeholders in every market to get to the routes of the the most significant hurdles. A comprehensive literature review, workshops and webinars will also be conducted.

The project will enable a comparative view of how easy it is to enter and compete in and across retail energy markets in Europe. Specifically, it will result in tools to assist entrants and policy makers alike.

Gas Transmission Tariff Setting Educational Workshop

6-8 May 2019 // Budapest, Hungary

Welcome from the Course Director and Main Lecturer

This focused 3-day workshop provides an in-depth and practical understanding of gas transmission tariff setting with a special focus on entry-exit regimes. The program will be a combination of expert presentations and simulated group work calculation. Topics discussed include capacity allocation, regulatory asset base and revenue reconciliation, reference price methodology and reserve price calculation.
